Summary of Proceedings In Fixing Water Schedule

The consideration of fixing the water schedule under the memorandum of agreement was continued by the City Council last night for a week, with the understanding that an additional week of grace will be granted, after which the rates will be adjusted in accordance with the aw.

As explained by President Pendleton, a slight hitch has arisen between the attorneys for both sides in regard to the dismissal by the Peoples Water Company of the injunction proceedings now pending in the court. This matter, however, is expected to be settled in a few days. People generally are anxious to have the litigation settled as soon as possible.

Get Rid of the Water Litigation.

The Council is to be commercied for proceeding with care and deliberation in the matter of alijusting the relations existing betweer the municipality and the Peoples Water Company, for a settlement effected with the slightest appearance of haste is likely to provoke course ersy, which is to be avoided, if possible, at this juncture. A full discussion and examination of all sides of the questical bending settlement will not only tend to the establishment of more larmor lens relations on a clear understanding that will eliminate friction, but will convey to the public an assurance that mutua rights are protected an' mutual obligations outlined and

Nevertheless, it is important, viewed in all lights, that an adjustment shall be reached without unnecessary delay. If the water company is to proceed with its plans for developing an additional water supply, in provinc its service and extending its distributing system, the litigation between the municipality and the corp.: gion bust be ended. This higation is a constant source of . irritation. It hampers developed it and if not disposed of threatens i to che k 'an'ding and expansion in the territory outlying the older." settled districts. It keers alive and fosters a spirit of antagonism and so prison, and prevents the hearty co-operation between the municipal government and the vater company that is essential to the future growth of the city and its environs.

The conditions out of which to litigation was an outgrowth have largely passed away, and new questions, springing from the unexampled increase in population and enlargement of the municipal boundaries, are presented for consideration. The litigation is a cloud on the company's credit at a time when it requires enormous sums to provide the betterment: and increase in supply demanded by the public and made necessary by the rapid growth of the city. To remove this cloud and at the same time decrease the earning power of the plant will still leave the company under a financial handicap. If the compary be burdened in its efforts to develop an assured abundance of water and improve its facilities for delivering it to consumers, the community will be burdened in still greater proportion.

It is folly to hobble a man and then ask him to run. The water company cannot meet the growing demands of the public if the threat of litigation and penalties be kept hanging over it, or it is, deprived of the ability to raise funds by diminishing its earning power. By pursuing a nurrow policy a small proportion of the rate payers can derive a benefit that will be individually trifling, but the general interests of the city will suffer a hundred times over. This is a time for taking a broad view of the situation and all the factors of the water problem.

What we need is a complete riddance of all the water litigation | ago of its morning edition in Eng., then bake them. The anniversary number will the shell and the interior resembles a sa large membership. Ten yours ago disturbance in the near future and an immediate augmentation of the water supply. That will clear the way for progress and development, remove the causes of irritation, and raise a barrier against agitation to serve political or personal ends.

The Flight of Burns and Gallagher.

Why was James L. Gallagher permitted to leave San Francisco and the jurisdiction of the California courts immediately after the late election across the bay? This question is given renewed interest by the statement ssued by District Attorney Fickert in refutation of the unmerited at d gratuitous imputations cast upon him by Judge Lawlor.

Galiagher was esten ibly guarded day and night by two of the Burns corps of detectives, yet he left the city and was gone three days before they pretenced to be aware of his absence, and then the fact of his disappearance was not reported officially, although the detectives who were supposed to keep him under surveillance were in the pay of the city. They excused themselves for their neglect by saying they were not authorized to interfere with Gallagher's movements, but were me ely instructed to guard him from harm. How vigilant this guardia iship was is illustrated by the fact that it mainly consisted of call ng up Gallagher's house by telephone two or three times a day and inquiring after his health.

Four days after the election William J. Burns, who furnished these alleged detectives and gav them their instructions, left hursiedly for the East and I as not returned to California. He has re-Insed to obey a subpoent directing him to appear here in connection with the so-called graft cares. Of his sudden departure the

Why Minister Went Into Politics

A l'aptist elergyman has left his ulpit in Spokane to enter politics as a candidate for Congress from the Turd district of Washinston, Ho says the gospel be "was living in a realm of fanciful theories and impractical idea's," and apparently wanted to "change his step," as the phrase goes.
